## AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph number 1, beginning at page 1, line 3, with the following rewritten paragraph:

Application No. PCT/US2004/24163, entitled "Battery Characterization Technique," filed on July 26, 2004, which claims priority from This application makes reference to Australian Provisional Patent Application No. 2003903839, filed July 24, 2003. Priority is claimed from this application for the present Application. In addition, this application is related to: US Patent 6,227,204, entitled "Device and process for charging of rechargeable batteries of implants," filed May 14, 1999; US Patent Application 09/654,731, entitled "Transcutaneous Power Optimization Circuit for a CochlearTM Implant," filed September 5, 2000; US Patent Application 10/257,170, entitled "Battery Monitor and Power Demand Adjuster," filed October 8, 2002; and US Patent Application 09/962,898, entitled "Multiple Battery Management System" filed September 25, 2001 and US Patent Application 10/883,809, entitled "Transcutaneous Power Optimization Circuit for a CochlearTM Implant," filed July 6, 2004. The entire disclosure and contents of the above applications are hereby incorporated by reference herein.
